CUSTOMER JOURNEY MAP

Map out the customer's experience stage-by-stage, capturing actions, touchpoints, thoughts, feelings, ownership, and opportunities.

Phase of Journey	Stage 1: Data Discovery & Access	Stage 2: Interactive Exploration	Stage 3: Strategic Decision & Export
Actions What does the customer do?	• Logs into the Flask Web Application dashboard. • Selects market parameters (Region: Europe, BEV vs. PHEV). • Bypasses requests to data team and skips manual CSV/PDF searches.	• Interacts directly with embedded Tableau dashboards. • Filters real-time data by date, policy impact, and market share. • Navigates guided Tableau Story for executive-level narrative insights.	• Extracts visual charts for PowerPoint presentations. • Evaluates competitor benchmarks and regional sales trends. • Presents findings to executive leadership to guide strategy.
Touchpoints What part of the service do they interact with?	• Flask Authentication & Navigation Hub • Global Filter Sidebar (Region, Date, Vehicle Type) • Live Data Status Indicator	• Embedded Tableau Interactive Dashboards • Guided Tableau Story Navigator • Dynamic Tooltips & Breakdown Cards	• One-Click Visual Chart Export Button • Executive Summary Report Section • Direct Share Link / Bookmark Feature
Customer Thought What is the customer thinking?	• *"Finally, I don't have to wait days for ad-hoc SQL queries."* • *"Can I quickly isolate European BEV vs. PHEV adoption for this quarter?"*	• *"This visual breakdown makes policy impacts clear at a glance."* • *"The guided story walks through market shifts step-by-step."*	• *"I have verified, up-to-date data ready for leadership."* • *"We can reallocate regional investment based on real-time trends."*
Customer Feeling What is the customer feeling?	**Relieved & Curious** Relieved to replace static files with a central portal; eager to explore live market trends.	**Engaged & Empowered** Empowered by seamless visual filtering and interactive storytelling without technical friction.	**Confident & Decisive** Confident knowing strategic decisions are backed by timely, clear data visualizations.
Process Ownership Who is in the lead on this?	**Frontend Lead / UX Designer** (Flask auth, layout, and portal navigation)	**Tableau Developer / BI Analyst** (Dashboard design, interactive filters, story flow)	**Product Manager / Business Analyst** (Data accuracy, export capabilities, business impact)
Opportunities How can we improve this stage?	• Automated email/Slack alerts for significant market shifts. • Quick-start template views for common regional queries.	• AI-generated natural language summaries alongside Tableau stories. • Custom drill-down views for specific OEM policy impacts.	• Direct PPTX slide deck auto-generation with populated charts. • Schedule automated weekly executive summary dispatches.
